Kročnost

John Smith je ocenjeval svoje podjetje - John Smith CE.

Vse je naredil v 15 minutah in je zelo zadovoljen z rezultati, čeprav je bil njegov končni nastop daleč pod ravniyo industrijskih meril. Prednost je dal predvsem vidikom izdelkov (življenjska doba izdelka, ponovna uporaba in recikliranje, poraba materialov in logistika, poraba energije in vode) in ugotovil, da so njihovi notranji mehanizmi resnično dobro razviti pri izpolnjevanju kvalitativnih vprašanj, povezanih z vidikom kategorije izdelka / priložnosti. Diagnostično orodje je pokazalo, da je kategorija izdelkov najbolj razvita in svojo funkcijo izpolnjuje na odličen način, saj je največ prispevala k končnemu rezultatu.

Nekatere pomankljivosti so bile odkrite v kategoriji krožnega poslovnega modela - nepopolno (rdeče) ujemanje barv kaže, da v smislu krožnih izdelkov podjetja (tj. izdelkov, namenjenih do konca življenjske dobe, tako da jih je enostavno vzdrževati, popravljati, nadgraditi, obnoviti ali predelati), povprečna pomembnost 6,70% se ne ujema z ocenjevanjem 0,00 (kvalitativna ocena = nizka uspešnost). To pomeni, da bo moral John Smith glede krožnih izdelkov nadgraditi ta vprašanja na stopnjo priprave ali integracije.

Circular Business Model	The company has a circular economy implementation plan.	1,22	12,23%	Management practices
	The company offers circular economy related training.	1,83	12,23%	Management practices
	Company's business model considers circular products (i.e. products designed for end-of-life by making them easy to maintain, repair, upgrade, refurbish or remanufacture).	0,23	2,32%	Circular design models
	The company delivers long-product life with high levels of guarantees and service and a high upfront price.	0,23	2,32%	Circular design models
	The company provides consumables, spare parts and add-ons to support the lifecycle of long lasting product.	0,04	0,77%	Optimal use
	The company delivers product access instead of the product itself, while retaining ownership of the product. This could be a combination of product and services, meaning single user uses the product (leasing, renting).	0,08	0,77%	Optimal use
	The company recaptures components and materials and use them in its processes.	0,24	4,76%	Value recovery
	The company transforms waste into raw materials? Additional revenue can be created through pioneer work in recycling technology.	0,00	4,76%	Value recovery
